take /teɪk/, **takes, taking, took, taken.** The most frequent use of **take** is in expressions where it does not have a very distinct meaning of its own, but where most of the meaning is in the noun that follows it (i.e. its direct object). The first paragraph gives examples of some of the main nouns which follow **take**, grouped as clearly as possible into different senses. **1 Take** is used **1.1** with nouns that refer to physical actions. There is often an equivalent verb, but using 'take' shows that the action is a separate and deliberate one, and not something that goes on indefinitely. So, for example, 'to take a look' means almost the same as 'to look', although it may suggest that the action is more deliberate. It also means that you can give more information about the action, as in the final two examples here. EG *He took a step towards Jack... Willie had taken a nap after lunch... She took a shower... He took a very deep breath... He formed the habit of taking long solitary walks.* **1.2** with nouns that mean 'photograph'. EG *I took a magnificent photo of him... He'd been out all day taking pictures of the fighting.* **1.3** with nouns that refer to a particular role, especially one of power or leadership. EG *The new government took office in July... EG *Not enough time or trouble is taken in introducing foster children to their new families... ...the dress she had taken so much care to choose.* **1.6** with nouns that refer to a time when you are not working, for example when you are on holiday. EG *She talked me into taking a week's holiday... Let's take a break... She's taken the day off.* **1.7** with nouns that refer to an attitude or opinion that you have or are expressing. EG *That is a very foolish attitude to take... The public was beginning to take a positive interest in defence... Mrs Hall is always quick to take offence.* **1.8** with nouns to form expressions that mean that you agree to accept the responsibility or blame for something. EG *She doesn't expect you to take the blame... I would be perfectly willing to take the consequences.* **1.9** with nouns referring to formal declarations such as oaths and vows. EG *He stood there frowning, resembling a man taking the oath in court... Nuns still take vows of poverty and celibacy and obedience.* **1.10** with a large number of other nouns to form expressions referring to actions, activities, or events of some kind. V-ERG □ In this dictionary V-ERG is used in the grammar notes beside entries to describe verbs which are both transitive (v + o) and intransitive (v) in the same meaning. They are described as V-ERG because there is a restriction on the type of subject which can be used with the intransitive verb. With V-ERG, the object of the transitive verb can be used as the subject of the intransitive verb.

For example *peas* is the object of the transitive verb *freeze* in *You can freeze peas* and it is the subject of the intransitive verb in *Peas freeze well*. Other examples are **open** and **boil**. EG *We couldn't* ***open*** *the window... The window* ***opened*** *easily... He had* ***boiled*** *the kettle... The kettle* ***boiled***. Some verbs are described as V OR V.ERG. Verbs described in this way have a transitive and intransitive use in the same way as the examples shown above and, in addition, they have an intransitive use with a subject which is different from the object of the transitive verb. An example is **sail**. EG *He* ***sailed*** *the boat towards Dover... The boat* ***sailed*** *towards Dover... He* ***sailed*** *towards Dover.*
